**Case Reports in Plastic Surgery and Hand Surgery: Vol 7, No 1**

Plastic surgery can involve a number of different techniques to move and manipulate body tissue. Before having plastic surgery, you should have a consultation with a plastic surgeon. ... In most cases, the skin remains partially attached to the body, creating a "flap". The flap is then repositioned and stitched over the damaged area.

**Plastic surgery - How it's performed - NHS**

100 Cases in Surgery The treatment is appendicectomy. The patient should be rehydrated with preoperative intravenous fluids, and receive analgesia. Antibiotics should be given if the diagnosis is clear and the decision for surgery has been made. Surgery should be carried out promptly

**100 Cases in Surgery - umfmed**

Day surgery is a continually evolving speciality performed in a range of ways across different units. In recent years, the complexity of procedures has increased with a wider range of patients now considered suitable for day surgery. Effective pre-operative preparation and protocol-driven, nurse-led discharge are fundamental to safe and effective day and short stay surgery.
