For a sine or cosine graph, simply go from 0 to 2π on the x-axis, and -1 to 1 on the y-axis, intersecting at the origin (0, 0).

$\{ \displaystyle y = \cos(x) \}$ repeat the same shape from negative infinity to positive infinity on the x-axis (you'll generally only graph a portion of it). $(x) \{ \displaystyle y = \sin(x) \}$.

are the same shape — cosine is the same as sine, just slid 90 degrees to the left. Also, notice that their simple wave shape goes as high as 1 and as low as -1 , and goes on forever to the left and right, repeating every 360 degrees. That's the period of both functions, 360 degrees.

The graph of $y=\sin(x)$ is like a wave that forever oscillates between -1 and 1, in a shape that repeats itself every 2π units.

Specifically, this means that the domain of $\sin(x)$ is all real numbers, and the range is $[-1,1]$. See how we find the graph of
