The Book True

During the 1700s the American colonists in South Carolina and Georgia discovered that rice would grow well in the moist, semitropical country bordering their coastline. But the American colonists had no experience with the cultivation of rice, and they needed African slaves who knew how to plant, harvest, and process this difficult crop.

Most favoured by slave owners were commercial crops such as olives, grapes, sugar, cotton, tobacco, coffee, and certain forms of rice that demanded intense labour to plant, considerable tending throughout the growing season, and significant labour for harvesting. The presence or absence of such crops and their relative profitability were among the major determinants of whether or not a slave-owning society became a slave society.
