The history of science during the Age of Enlightenment traces developments in science and technology during the Age of Reason, when Enlightenment ideas and ideals were being disseminated across Europe and North America. Generally, the period spans from the final days of the 16th and 17th-century Scientific Revolution until roughly the 19th century, after the French Revolution and the Napoleonic era. The scientific revolution saw the creation of the first scientific societies, the rise of Coperni

Answered May 6, 2018. It is because we are, this is the first time in human history, where we have technology and science is widely accepted, without being ridiculed by religious figures. We are truly out of the dark ages and the basic humanity of a few hundred years ago and we are now in the age of light, where people can be cured of many ailments and you dont even have to get up from your lazy buttocks to get food, you can just shout at a machine to do it.

Why is the modern age called the age of science and ...

Description. Science in the Age of Reason is the fourth book in a hands-on, multilevel elementary science series that introduces scientific concepts using history as its guide. It covers the scientific works of natural philosophers from the early 1600s to the early 1800s. Because the course covers science as it was developed, it discusses a wide range of topics including astronomy, medicine, botany, zoology, chemistry, geology, human physiology, electricity, conservation laws, and weather.
